

Below is a copy of today's leaf spot advisory. The last effective spray date (LESD) for each location is highlighted, indicating that weather has been favorable for leaf spot development at all advisory locations.

Given current advisories, and with heavy rain possible due to the approach of Tropical Storm Elsa, growers should make sure to apply leaf spot protection *now* if the crop has not been sprayed to date, or if it has not been sprayed within the last 14 days.

July 6, 2021 PEANUT LEAF SPOT ADVISORY FOR BUCK
Buckland Elementary (Gates, NC)

LESD = 2021-06-19
