Apogee and Kudos in Peanuts

- Apply when 50% of vines from adjacent rows are touching
- Use UAN or AMS based on label
- Use crop oil concentrate (nonionic surfactant?)
- Repeat applications in 2 to 3 weeks if needed
- Do not make 3 applications within 6 weeks
- PHI is 21 days
- Compatible with many products (adjuvant?)
- Consistently improves row visibility
- Consistent increases in yield with old varieties in small plots
- Consistent increases in yield with newer varieties in large plots
- Some yield increase is associated with pod retention
- No documented impact on disease
- Other
