Peanuts planted July 2

Pod maturity at Whiteville, North Carolina on August 30 of 2022 and 2023 for the variety Bailey II and Walton planted during the first week of May during both years. A darker pod mesocarp color indicates a more mature pod. Pod mesocarp is a good indicator of kernel development and weight.

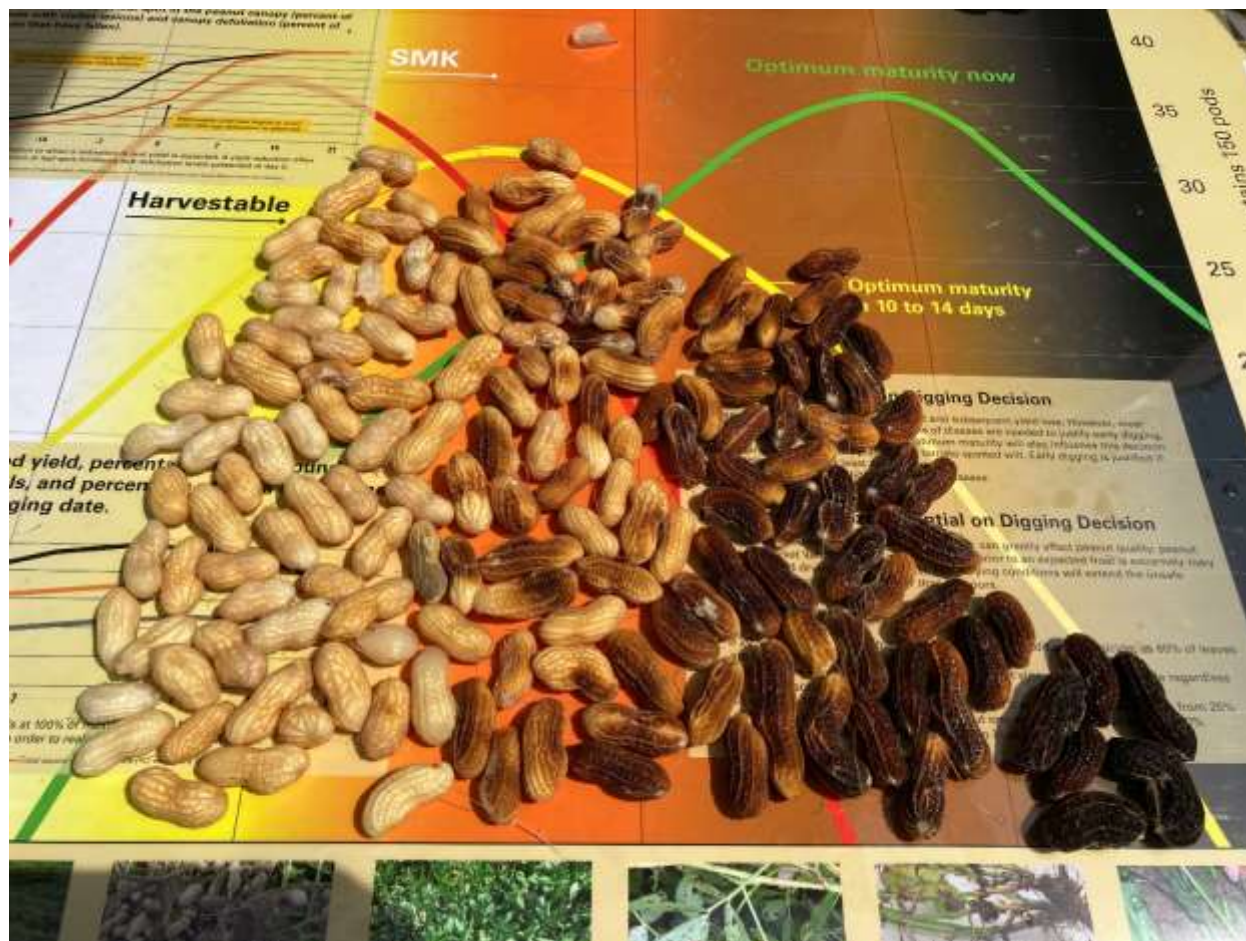

Bailey II in 2022

Bailey II in 2023

Walton in 2022

Walton in 2023

Bailey II planted at Lewiston-Woodville in early May with image recorded on August 28. These peanuts have been irrigated several times late in the season.

Pod maturity from two fields near Rocky Mount, NC on August 28. These peanuts were irrigated several times to augment rainfall.
